-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Claims 5-9 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from another multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims have not been further treated on the merits.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-4 and 10-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bennett 3809069 in view of Gevins et al 6434419. Bennett shows a method of evaluating the intelligence of a user by providing a stimulus to a user, recording the brain activity of the user while the stimulus is presented, deriving the SSVEP amplitudes from the brain activity, and comparing the amplitudes to known SSVEP amplitudes to identify the intelligence of the user. The stimulus is not a group of tasks. However, Gevins teaches that it is known to derive a measure of intelligence from SSVEP signals obtained by using a group of tasks as the stimulus. Hence, it would have been obvious to modify Bennett to use the stimulus of Gevins as the stimulus, as it is merely the substitution of one known equivalent stimulus from another. The examiner notes that the intelligence of a person is the aptitude to perform any cognitive task. Claim 2 is rejected in that the known SSVEP data is obtained by showing the same group of tasks to individuals. Claim 3 is rejected in that the tasks of Gevins present similar demands on the user as the predetermined task. Claim 4 is rejected in that the tasks of Gevins

include working memory. Claim 10 is rejected in that the combination also has the structure. Claims 11 –12 are rejected in that Gevins further teaches sending the data for analysis over the internet to a remote location. Hence, it would have been obvious to modify Bennett to use such a processing technique, as it is merely the substitution of one known processing technique for another.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Amidzic et al 2006/0064028, Connelly et al 6993381, Hursh 6579233, and Cady et al 6416472 all show similar devices that evaluate cognitive ability in one form or another.
